

FINE MOTOR SKILLS ACTIVITY LIST

Everyday activities that build your child's hand strength and coordination at home.

No special tools needed — just what you already have at home.

In the Kitchen

Pouring water or juice between cups.

Stirring batter or soup.

Peeling bananas or oranges.

Tearing lettuce or herbs.

Using a child-safe knife to spread butter.

Picking up small items like raisins or cereal with fingers.

Squeezing a lemon or orange.

Art and Craft

Tearing and gluing paper scraps.

Cutting with scissors along lines.

Threading pasta or beads onto string.

Colouring inside shapes with crayons.

Squeezing glue bottles.

Rolling and flattening playdough.

Drawing with chalk on pavement.

Play and Everyday Life

Buttoning and unbuttoning clothes.

Zippering and unzipping bags.

Building with Lego or small blocks.

Using tongs or chopsticks to move objects.

Picking up coins and sorting them.

Winding up a wind-up toy.

Turning pages in a book one at a time.

PARENT NOTE: Fine motor skills develop through repetition and play. These activities count as practice even when they feel like fun.

Strong little hands start with everyday moments.
